Description of findings – could be in the form simple narrations, or in the form of questions and answer...

- the polling station was located in the neighbor constituency (E 05 Charming), which caused great inconvenience since many Charming residents went to the polling station
- in both half the exit poll results showed that candidate #3 had a dominant advantage mainly due to his political background (DP)
- an old woman was doing subtle promotion for candidate #3 by asking voters if they would vote for him, and giving an intangible pressure to them
- there was a car broadcasting anti-Tung message and urged people to vote for pro-democratic candidates
- some interviewees expressed their discontent on DAB; a few said they voted for DP candidate simply because they wanted to make DAB lose. (投死民建聯)
- candidates with parties support had more resources

Conclusions drawn from your observation

- the location of polling station revealed a poor planning of election affairs
- the monitoring of campaign activities was bad
- the election was a way to reflect people's discontent on DAB
