Press Release on September 5, 2004

HKU POP SITE and Civic Exchange releases the 27th Legislative Council election rolling survey result

Preamble

This year, the Public Opinion Programme (POP) at the University of Hong Kong and the Civic Exchange are jointly conducting a series of rolling surveys on the 2004 Legislative Council direct elections starting from August 4. While the background and the methodology have been discussed before, please refer to the websites of POP and Civic Exchange at <http://hkupop.hku.hk> and <http://www.civic-exchange.org> respectively for the details. This press release mainly highlights the key findings in the rolling surveys conducted from August 30 to September 3, previous findings dating back to August 4 are available in the websites mentioned.

Knowledge of the election

The latest territory-wide rolling surveys (i.e. September 1 to 3) revealed that, 31% of the voters interviewed had no idea on any list in their geographical constituency, while 69% knew at least one list. For the scenarios in individual constituencies, please refer to the websites for details.

Territory-wide rolling surveys							
Date of survey	27-29/8	28-30/8	29-31/8	30/8-1/9	31/8-2/9	1-3/9	<i>Latest change</i>
Sample base	1,285	1,297	1,305	1,364	1,439	1,559	--
Sub-sample base *	--	--	--	1,109	907	712	--
Overall response rate	73.9%	73.7%	73.9%	74.6%	74.6%	74.6%	--
Sampling error of percentages (at 95% conf. level)**	+/- 3%	+/- 3%	+/- 3%	+/- 3%	+/- 3%	+/- 3%	--
Totally no idea on the list in their constituency	36%	37%	35%	34%	32%	31%	-1%
Knew at least one list in their constituency ^	64%	63%	65%	66%	68%	69%	+1%
Knew at least half of the lists in their constituency ^	27%	28%	33%	35%	36%	33%	-3%
Knew all lists in their constituency ^	3%	3%	5%	5%	7%	5%	-2%

*From 1/9 onwards, 2 split questionnaires are used in our rolling poll. As this question only appears in one split questionnaire, the sub-sample size is therefore different.

** "95% confidence level" means that if we were to repeat a certain survey 100 times, using the same questions each time but with different random samples, we would expect 95 times getting a figure within the error margins specified.

^ Since overlapping exists among these 3 answers, the total would add up to over 100%.

Propensity to vote

The territory-wide rolling surveys from September 1 to 3 revealed that, the registered voters' propensity to vote was 83%. Nevertheless, this percentage should never be taken as a projection of the actual turnout rate because many people who claimed they would vote at this stage would eventually not vote. For the scenarios in individual constituencies, please refer to the websites for details.

Stray voters

Since many voters still had not decided how to cast their vote, while stray voters would always have significant influence on the election result, the POP Team therefore further look into the distribution of these votes in 5 constituencies. Firm voters are defined as those who said they would definitely and most likely vote, and have also decided to vote for which list, while stray voters are defined as those who said they would definitely and most likely vote, but have not decided to vote for which list. The rolling surveys in individual constituencies from August 30 to September 3 showed that, there were around 23-30% of stray votes in each of the 5 constituencies, while the largest proportion of stray votes was found in Kowloon East and New Territories West (30%), the smallest in Hong Kong Island (23%). ^Included responses of "Won't vote" and "Won't support any political parties or candidates".

The support ratings shown above have not excluded those who had not decided and claimed not to vote. Readers may exclude this group of uncertain voters (assuming that they would not vote at all), reallocate the vote share according to the new base. The number of seats obtained by each list can then be deduced based on the Largest Remainder Formula. Yet, one must take note of the sampling errors.

It must be stated that since many voters have not yet made their choice, while most candidates' election campaign is still in progress, the influence of these stray votes is yet to be seen. For the other rolling surveys' result, survey method, contact information, respondents' demographics and full questionnaires, please refer to the websites for detailed information.

Other points to note

POP will release the latest results of the rolling surveys every day at 2 pm via our POP Site. Shall anyone have any question regarding the research design of the surveys published in the POP Site, members of the POP Team will be happy to answer them, but we will not further comment on the findings. Shall any person or journalist have any other questions, please email them to us at <pop.network@hkupop.hku.hk>. Please note that everything carried in the POP Site does not represent the stand of the University of Hong Kong. Dr Robert Ting-Yiu Chung, Director of Public Opinion Programme, is responsible for everything posted herewith, except for column articles which represent the stand of their authors.
